SUMMARY

Aspiring Software Developer pursuing an MCA in Artificial Intelligence and Data Science, with a BCA degree specialized in Cloud Computing and top academic honours. Skilled in cross-platform app development, cloud infrastructure, and AI-driven solutions. Passionate about building efficient, user-centric software while staying current with emerging technologies. Eager to contribute technical expertise and innovation to a forward-thinking team.

EXPERIENCE

AWS Cloud Intern

F13 Technologies

May 2025 - Present, Delhi

- Built a face recognition attendance system using Rekognition, Lambda, S3, API Gateway, and DynamoDB reducing manual efforts by 80%.
- Created a smart farming dashboard with IoT Core, QuickSight, Glue, Athena, and SNS alerts to monitor 5+ sensor metrics in real time.
- Drafted a cloud migration plan for an e-commerce app, ensuring minimal downtime and 60% estimated cost savings.
- Developed a cloud file manager with role-based access and secure sharing via pre-signed URLs, used by multiple user types.

Full Stack Developer

DYPIU, Summer Internship

July 2025 - Present, Pune

- Creating a web-based admin panel, managing library operations and an inventory of **2,000+ books**.
- Developing a cross-platform library app for **5000+ students and faculty**, streamlining book issue/return and reducing manual workload by **60%** using Flutter, BLoC, and Clean Architecture.
- Building a secure Flask backend with **JWT authentication**, **SMTP-based password recovery**, and **rate limiting (5 requests/min)** to prevent misuse; deployed on an **on-premise Linux server**.

Android Developer Intern

CodTech IT Solutions, India

February 2024 - March 2024

- Built 3+ Flutter apps, including a University Attendance System, improving attendance tracking efficiency by 30%.
- Optimized app performance by 25% using BLOC & Provider state management and efficient API integration.
- Reduced debugging time by 30% through structured code practices and Firebase integration.

CERTIFICATIONS

AWS Certified Solutions Architect Associate

2023 - 2026

PROJECT

SkyShift - Elevating your code to Cloud Horizons

- Engineered a one-click cloud deployment system, reducing deployment time by 90%.
- Automated CI/CD pipeline integration, enabling seamless deployment across AWS, Azure, and GCP.
- Developed Terraform-based infrastructure automation, minimizing manual configuration errors by 90%.

RemoteTech Remote Device Manager

- Designed and developed a centralized IoT-based remote device management system, reducing manual management effort by 40%.
- Implemented advanced IoT protocols, improving device connectivity and reducing system downtime by 35%.
- Integrated smart security measures, enhancing cybersecurity resilience by 50% and safeguarding remote operations.

WritingMate - Text to Handwriting Converter

- Developed a Python-based script to automate text-to-handwriting conversion, reducing manual effort by 40%.
- Implemented optimized data structures and algorithms, improving file processing speed by 25%.
- Designed a customizable font rendering system, enabling users to personalize handwritten outputs.

EDUCATION

Master of Computer Applications

D. Y. Patil International University Pune, India · Pune, India · 2026 · 9.64/10

- Awarded Emerging Talent Scholarship and Academic Excellence Scholarship

Bachelor of Computer Applications

Minor in Cloud Computing · D. Y. Patil International University Pune, India · Pune, India · 2024 · 9.56/10

- Gold Medalist, Awarded Academic Excellence scholarship

SKILLS

- **Languages & Frameworks:** Python, Dart, Flask, MySQL, Firebase Firestore, Supabase
- **App Development:** Flutter, Cross-platform Development, Clean Architecture, BLoC, Provider
- **Cloud & DevOps:** AWS (EC2, S3, Lambda, RDS, VPC), Terraform, CloudFormation, Docker, Jenkins, GitHub Actions
- **Databases:** MySQL, MongoDB, DynamoDB, Firebase Firestore
- **AI/ML & Tools:** TensorFlow, Scikit-Learn, OpenCV, Matplotlib
